PREFACE

Alberta Recreation and Parks is pleased to provide for your use, the 1990-1991 "Park User Statistics - Fiscal Year Summary" report.

The Provincial Parks Service of Alberta Recreation and Parks collects four basic types of visitation information:

1. **Camping Use Statistics** - collected through permit sales, reasonable estimates and camper surveys;
2. **Day Use Statistics** - collected through Automatic Traffic Counter readings and traffic surveys;
3. **Group Camping Use Statistics** - collected through permit sales; and
4. **Fixed Roof Accommodation Use Statistics (Kananaskis Country)** - collected through receipts.

Visitation statistics contained herein are reported at the "park" or "management unit" level for Provincial Parks, Provincial Recreation Areas, and Sub-Districts within Kananaskis Country. "Area" level statistics (i.e. individual campgrounds, day use areas, group use areas, fixed roof accommodation facilities), although not reported in this summary, are available upon request.

The data collection systems associated with these visitation statistics are discussed in detail in the Introduction Section. Inquiries regarding the user statistics reported in this document or a further explanation of the methodology are welcomed, and should be directed to the Management Information Coordinator at 427-6791.

INTRODUCTION

Implementation of the revised Park User Statistics Collection (P.U.S.C.) System, following an extensive revision study, occurred in April, 1986. This report presents Park User Statistics for the period of April 1, 1990 to March 31, 1991. Information is presented for all Provincial Parks, Sub-Districts within Kananaskis Country, and Provincial Recreation Areas outside of Kananaskis Country at the "management unit" level. Sub-management unit level statistics (e.g. individual campground statistics) are not reported, but are available upon request.

Tables summarizing camping use, campground occupancy, day use, group use, and fixed roof accommodation use statistics are included in this report. Brief descriptions of the data collection methodologies used for each category of use statistics are presented below.

Camping Statistics Methodology

Camping statistics are based primarily upon information obtained from camping permits. These permits are issued via two systems: the Standard Camping Permit and the Self-Registration Permit (envelope) systems. In the absence of permit sales (e.g. some campgrounds during the off-season), reasonable estimates of camping use are provided by park staff. Information collected through these systems is recorded on Park User Statistics Summary (P.U.S.S.) sheets, by the Parks, and subsequently forwarded to Edmonton (Head Office). This information includes data on occupied campsite nights, turnaways, and site closures.

Standard Camping Permits and associated periodic surveys provide information on occupied campsite nights, average camping party size and accommodation unit usage. This information enables calculation of individual camper nights and accommodation unit nights (see Glossary of Terms). Occupied campsite nights are based on the premise that a site is considered occupied when a permit has been issued and that site is occupied by the permittee and at least one camping accommodation unit. Campground turnaways are recorded each time a camping party is personally turned away because no campsites were available. This information is recorded on monthly P.U.S.S. sheets and is presented in this report.

Self-Registration Permits also provide statistics on occupied campsite nights, and require periodic surveys to provide data on camping party size and accommodation unit usage. Turnaway counts by park staff are not always made owing to the self-administered nature of registration.

It is **important** to note that, in any self-registration system, non-compliance (i.e. campers not voluntarily completing a permit) can adversely affect the reliability of camping use statistics. This problem is normally addressed by compliance checks conducted by park staff and the inclusion of non-complying occupied campsite night figures. For Provincial Recreation Areas however, where daily patrols cannot always be done, fewer days are available for non-compliance adjustments resulting in an **under-estimation** of camping use.

Campground occupancy data are determined from an analysis of: (1) campground capacity, (2) the number of weekday and weekend days in a specific month, (3) the number of sites affected by closures per day, and (4) the total occupied campsite nights per month. Refer to the Glossary of Terms for the formulas used in calculating campground occupancy rates and average daily percent campground occupancies. In addition, overflow unit night figures are included in the occupancy data tables whenever appropriate.

Backcountry use is collected through a system of user surveys and is reported in the Provincial and Kananaskis regional summary tables as well as in the appropriate District and Sub-District summaries.

Day Use Statistics Methodology

An evaluation of day use data collection procedures in 1981 concluded that the methodology then in use was non-systematic and resulted in day use statistics which were not accurate. Consequently a day use calibration program was implemented in the summer of 1983 and since then, all Provincial Parks have been surveyed as well as the sub-districts within Kananaskis Country.

For the Provincial Parks and the sub-districts within Kananaskis Country, peak season (April 1 - September 30) day use statistics are now based on figures collected from automatic traffic counters. Adjustments to these counts include determining the ratio of day use vehicles to all other vehicles entering or exiting the park and mean party size. Both adjustment factors are obtained through a periodic day use calibration survey. The survey involves stopping traffic on 20 randomly selected days during the peak season to conduct brief interviews. Daily vehicle counts and the survey information are analyzed to yield estimates of day use visitation.

It is important to note a significant change to the day use statistics reported for Provincial Recreation Areas. For the majority of Provincial Recreation Areas outside of Kananaskis Country, day use statistics prior to 1989 were, for the most part, calculated using camping figures multiplied by the relative relationship between camping and day use. Beginning in 1989 however, day use statistics for all these Provincial Recreation Areas are based upon Automatic Traffic Counter readings as in Provincial Parks.

The day use methodology for Provincial Recreation Areas adjusts traffic counts for camper traffic (determined from permit sales and estimates of non-compliance and multiple entries/exists) and non-recreational vehicles (from records of park staff) to yield survey information and the estimates of day use visitation. This approach to day use estimation is referred to as the Residual Method. Due to the change in the collection methodologies at Provincial Recreation Areas, no historical day use comparison is provided prior to the implementation of the residual method.

Group Camping Statistics Methodology

A standard system for collecting group camping use statistics was implemented in 1986. No prior statistics are available. Currently the group use permit system collects information pertaining to group camping unit nights, individual group camper nights, and occupancy. A survey component of the group use permit provides the average number of people in a group unit which is required to calculate individual group camper nights.

Fixed Roof Accommodation Use Statistics Methodology

Occupied room nights and people nights are derived from receipts, summarized and forwarded from Kananaskis Country to Head Office via the P.U.S.S. sheet.

GLOSSARY OF TERMS

CAMPING

ACCOMMODATION UNIT NIGHTS:	Average number of accommodation units per campsite multiplied by the monthly total of occupied campsite nights.
AVERAGE CAMPING PARTY SIZE:	Average number of people per occupied campsite. This is determined for each area by a periodic survey of camping permits.
AVERAGE DAILY PERCENT CAMPGROUND OCCUPANCY: (WEEKEND/WEEKDAY/TOTAL)	Total occupied campsite nights divided by (weekend, weekday, monthly total) Number of sites affected by a closure for each day of the month, subtracted from the campground capacity for each day of the month. Resultant figures are totaled for weekends, weekdays and the month.
CAMPGROUND OCCUPANCY RATE: NO. OF NIGHTS AT % OCCUPANCY	Occupied campsite nights divided by Campground capacity minus the number of sites affected by closure.
CAMPING ACCOMMODATION UNIT:	A tent, a tent-trailer, a travel-trailer, a motorhome, a camperized van, or a truck camper.
CAMPING PARTY SIZE:	The total number of people present on an occupied site (regardless of the number of camping accommodation units occupying a site).
INDIVIDUAL CAMPER NIGHTS:	Average camping party size multiplied by the number of occupied campsite nights.
OCCUPIED CAMPSITE NIGHT:	One site occupied for one night.
OCCUPIED CAMPSITE:	A site that is occupied by at least one camping accommodation unit.
OVERFLOW UNIT NIGHT:	One camping accommodation unit in area designated as an overflow area for one night.
SITE NIGHTS AVAILABLE:	Campground capacity multiplied by nights per month minus sites closed per month multiplied by nights affected.
TOTAL OCCUPIED CAMPSITE NIGHTS:	The monthly or seasonal totals of the individual daily sums of occupied campsite nights.
TURNED AWAY PARTY:	A party which has been informed, by a park representative, that they cannot be accommodated on account of all available sites being occupied at a specified time.

DAY USE

AVERAGE DAY USE PARTY SIZE:	Average number of people associated with a vehicle entering a Provincial Park or Provincial Recreation Area for one day or portion of one day without staying overnight. This is determined by a periodic survey of day users.
DAY USE PARTY VISIT:	Person(s) in a vehicle entering a Provincial Park or Provincial Recreation Area for one day or portion of one day without staying overnight.
	NOTE: In the case of "walk-in" day users, a party is considered to be one or more individuals who appear to enter the park together.
INDIVIDUAL DAY USERS:	Person(s) making a recreational visit to a Provincial Park or Provincial Recreation Area for one day or portion of one day without staying overnight.

GROUP USE

GROUP AREA NIGHTS AVAILABLE:	Number of group use areas multiplied by nights per month minus group areas closed per month multiplied by nights affected.
GROUP AREA NIGHTS OCCUPIED:	Sum of the number of nights a group use area has been actually occupied over a specified period of time.
GROUP UNIT NIGHT:	One camping accommodation unit in an area, designated as a group use area for one night.
GROUP INDIVIDUAL CAMPER NIGHTS:	Average camping party size multiplied by the number of group unit nights.

FIXED ROOF ACCOMMODATION USE

OCCUPIED ROOM NIGHT:	One room occupied for one night.
PEOPLE NIGHTS:	Average number of people per room multiplied by the number of occupied room nights.

Note: - Prior to 1988/89, Day Use Party Visits do not include off-season Kananaskis Country use.
- Occupied campsite night figures, prior to 1987/88, do not include provincial recreation area use due to the incompatibility of collection methodologies.

Trans-Canada Sub-District	19,327	963	96,725	117,015	56,677	3,299	280,780	340,756
EAST DISTRICT	36,767	2,548	167,120	206,435	116,350	7,256	434,268	557,874
Elbow Sub-District	30,356	1,256	157,690	189,302	94,767	3,425	410,457	508,649
Sheep Sub-District	6,411	1,292	12,050	19,753	21,583	3,831	31,737	57,151
WEST DISTRICT	40,826	2,938	67,905	111,669	130,660	8,773	175,102	314,535
Highwood Sub-District	5,556	1,374	27,290	34,220	16,835	4,121	67,218	88,174
Peter Lougheed Park Sub-District	31,067	1,564	55,405	88,036	100,741	4,652	148,399	253,792
Spray Lakes Sub-District	4,203		26,885	31,088	13,084		69,386	82,470

Note: Refer to individual Park tables in text for factors influencing use.

For Kananaskis Country day use figures, the sub-district totals do not sum to corresponding district totals, and subsequent regional totals. This is because day use visitation has been discounted where the route of travel passes through more than one sub-district, thereby avoiding repeated counting of day users.

TABLE 3 NUMBER OF OCCUPIED CAMPSITE, ACCOMMODATION UNIT, AND INDIVIDUAL CAMPER NIGHTS, BY MANAGEMENT UNIT: 1990 / 1991 FISCAL YEAR
